

EXECUTIVE TAKEAWAY

**Momentum is building in AML, cloud, AI, fraud, but we s
stronger proof and stakeholder confidence to turn tract
expansion.**

WHAT'S WORKING

AML, cloud, AI, fraud

Bank of America remains a large-scale modernization and control environment where execution credibility matters as much as innovation language. The account is under constant pressure to improve resilience, fraud controls, AML throughput, data access, and cloud maturity without increasing operational risk. That creates room for a partner who can show disciplined delivery, not just ideas.

WHERE WE ARE LOSING

**Signals are strong, but
credibility still needs clearer
proof packaging.**

Stakeholder momentum can drop when next steps are not tightly tied to account pain.

CORE INSIGHT

**Lead with controlled execution, procurement-defensible proof, and a poi
view on AML, fraud, cloud, and AI adoption with governance.**

IMMEDIATE ACTIONS

- ? Launch one focused proof-led follow-up tied to current stakeholder priorities.
- ? Activate sales with one clear message, one proof point, and one next-step ask.
- ? Use current signals to shift from broad visibility to account-specific credibility.
